

B1
concl
surface 111 is not directly brought into contact with the periphery of the imperfect transfer portion 141. In other words, the imperfect transfer portion 141 does not reach the first transfer surface 111. Accordingly, the plastic lens 3A can be formed with low deformation and high accuracy.

IN THE CLAIMS

Please amend the claims as shown in the attached marked-up copy. A clean copy as amended appears below.

B2
18. (Twice Amended) The plastic molding according to claim 17, wherein the imperfect transfer portion is formed in a portion other than the at least one transfer surface.

19. (Twice Amended) The plastic molding according to claim 18, wherein the imperfect transfer portion is formed in an extension-surface of the at least one transfer surface.

REMARKS

Favorable consideration of this application, as presently amended and in light of the following discussion, is respectfully requested.

Claims 1-29 are pending in this application; and Claims 18 and 19 having been amended by the present amendment.

In the outstanding Office Action, Claims 1-16 and 25-29 were withdrawn from consideration; Claims 17-20 and 22-24 were rejected under 35 U.S.C. § 103(a) as unpatentable over Kanematsu et al in view of Hirofumi et al; and Claim 21 was indicated as allowable.

Applicants thank the Examiner for the indication of allowable subject matter.
